STATISTICS

This document reports the details of 292 individuals, of which 152 are male and 140 are female. Of the 65 individuals with recorded birth and death dates, the average lifespan was 54.6 years. Of these, 41 males averaged 55.4 years, and 24 females averaged 53.2 years.

The longest living male was Amadeo V Of Savoy, who died aged 104. The longest living female was Maria Carmela Antonia Rosa Abela, who died aged 84.

There are 145 families reported. 141 of these families are reported as having children, with an average of 1.3 children per family.

THE NARRATIVE SECTIONS

The "Direct Relations" section reports the details of individuals who have a direct family connection to Henry Of Bavaria. The section is broken into sub-sections for each generation, within which the individuals are listed in order of closeness of relationship. The sequence numbers are used through the document to cross-reference back to the detailed entry of an individual.

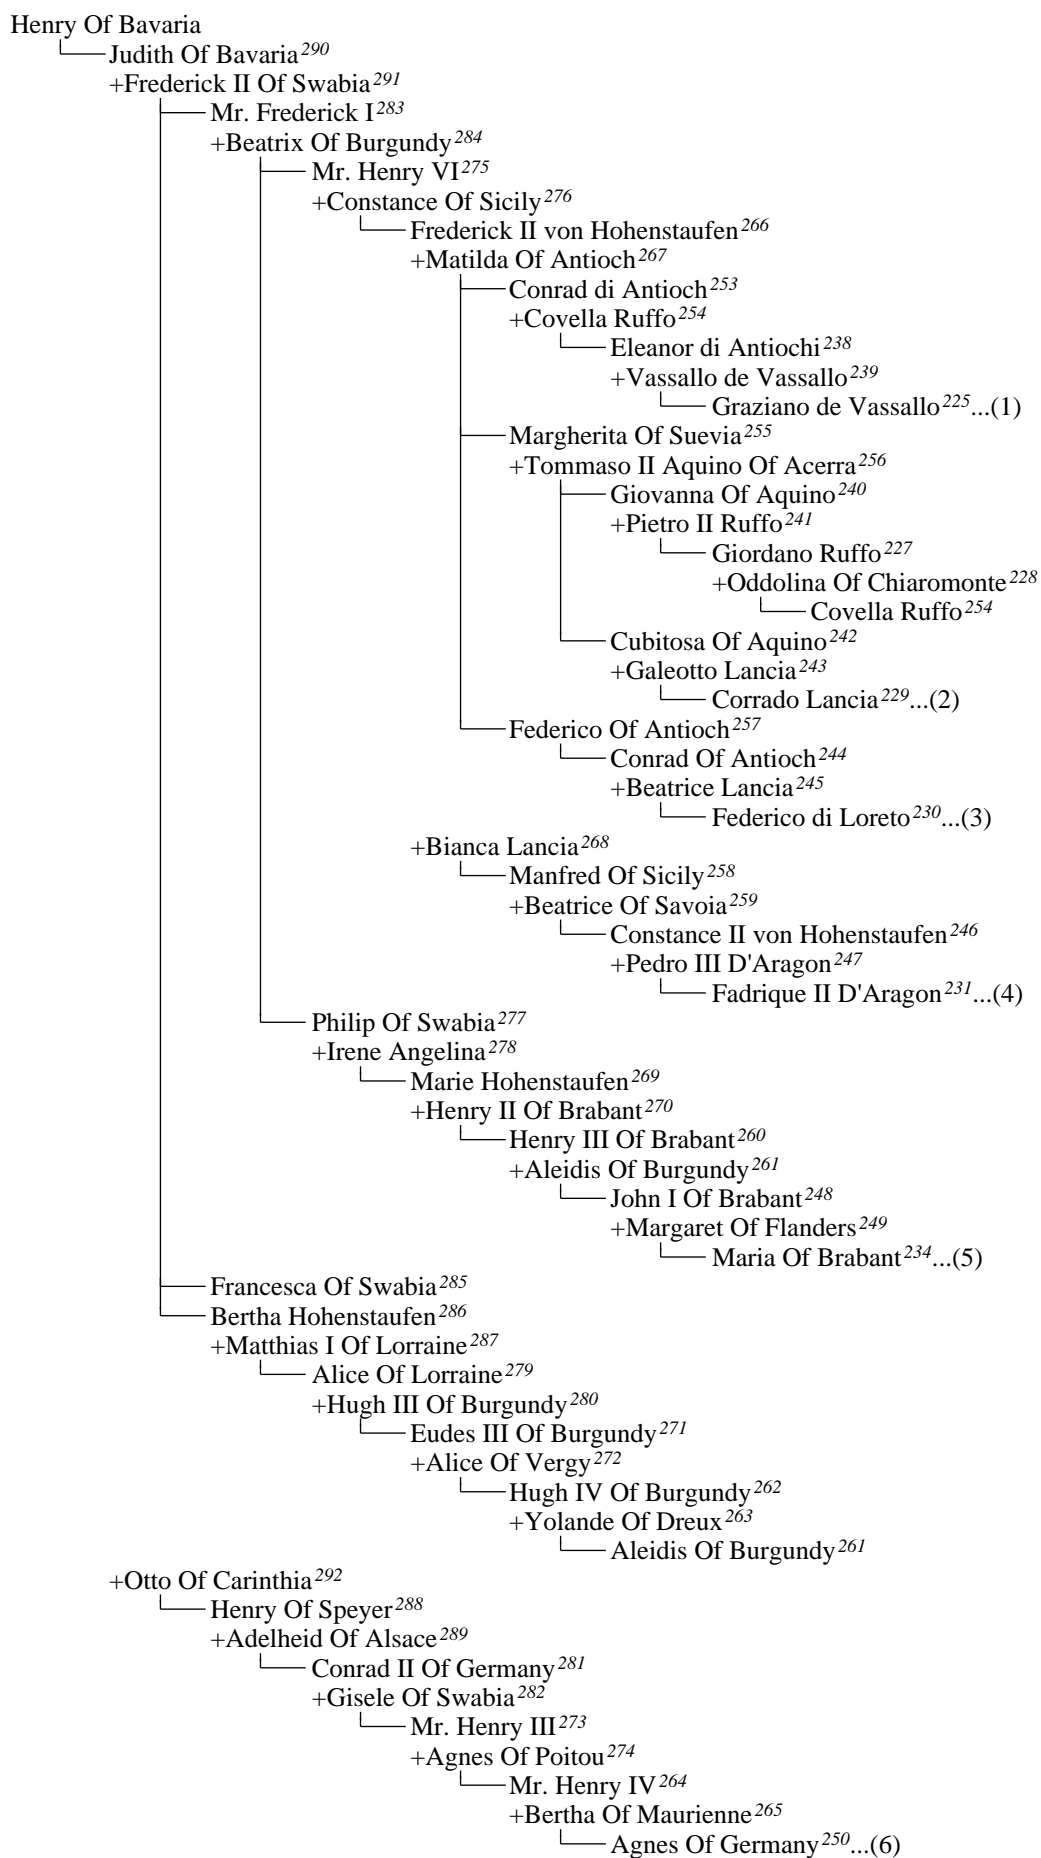

FAMILY TREES SECTION

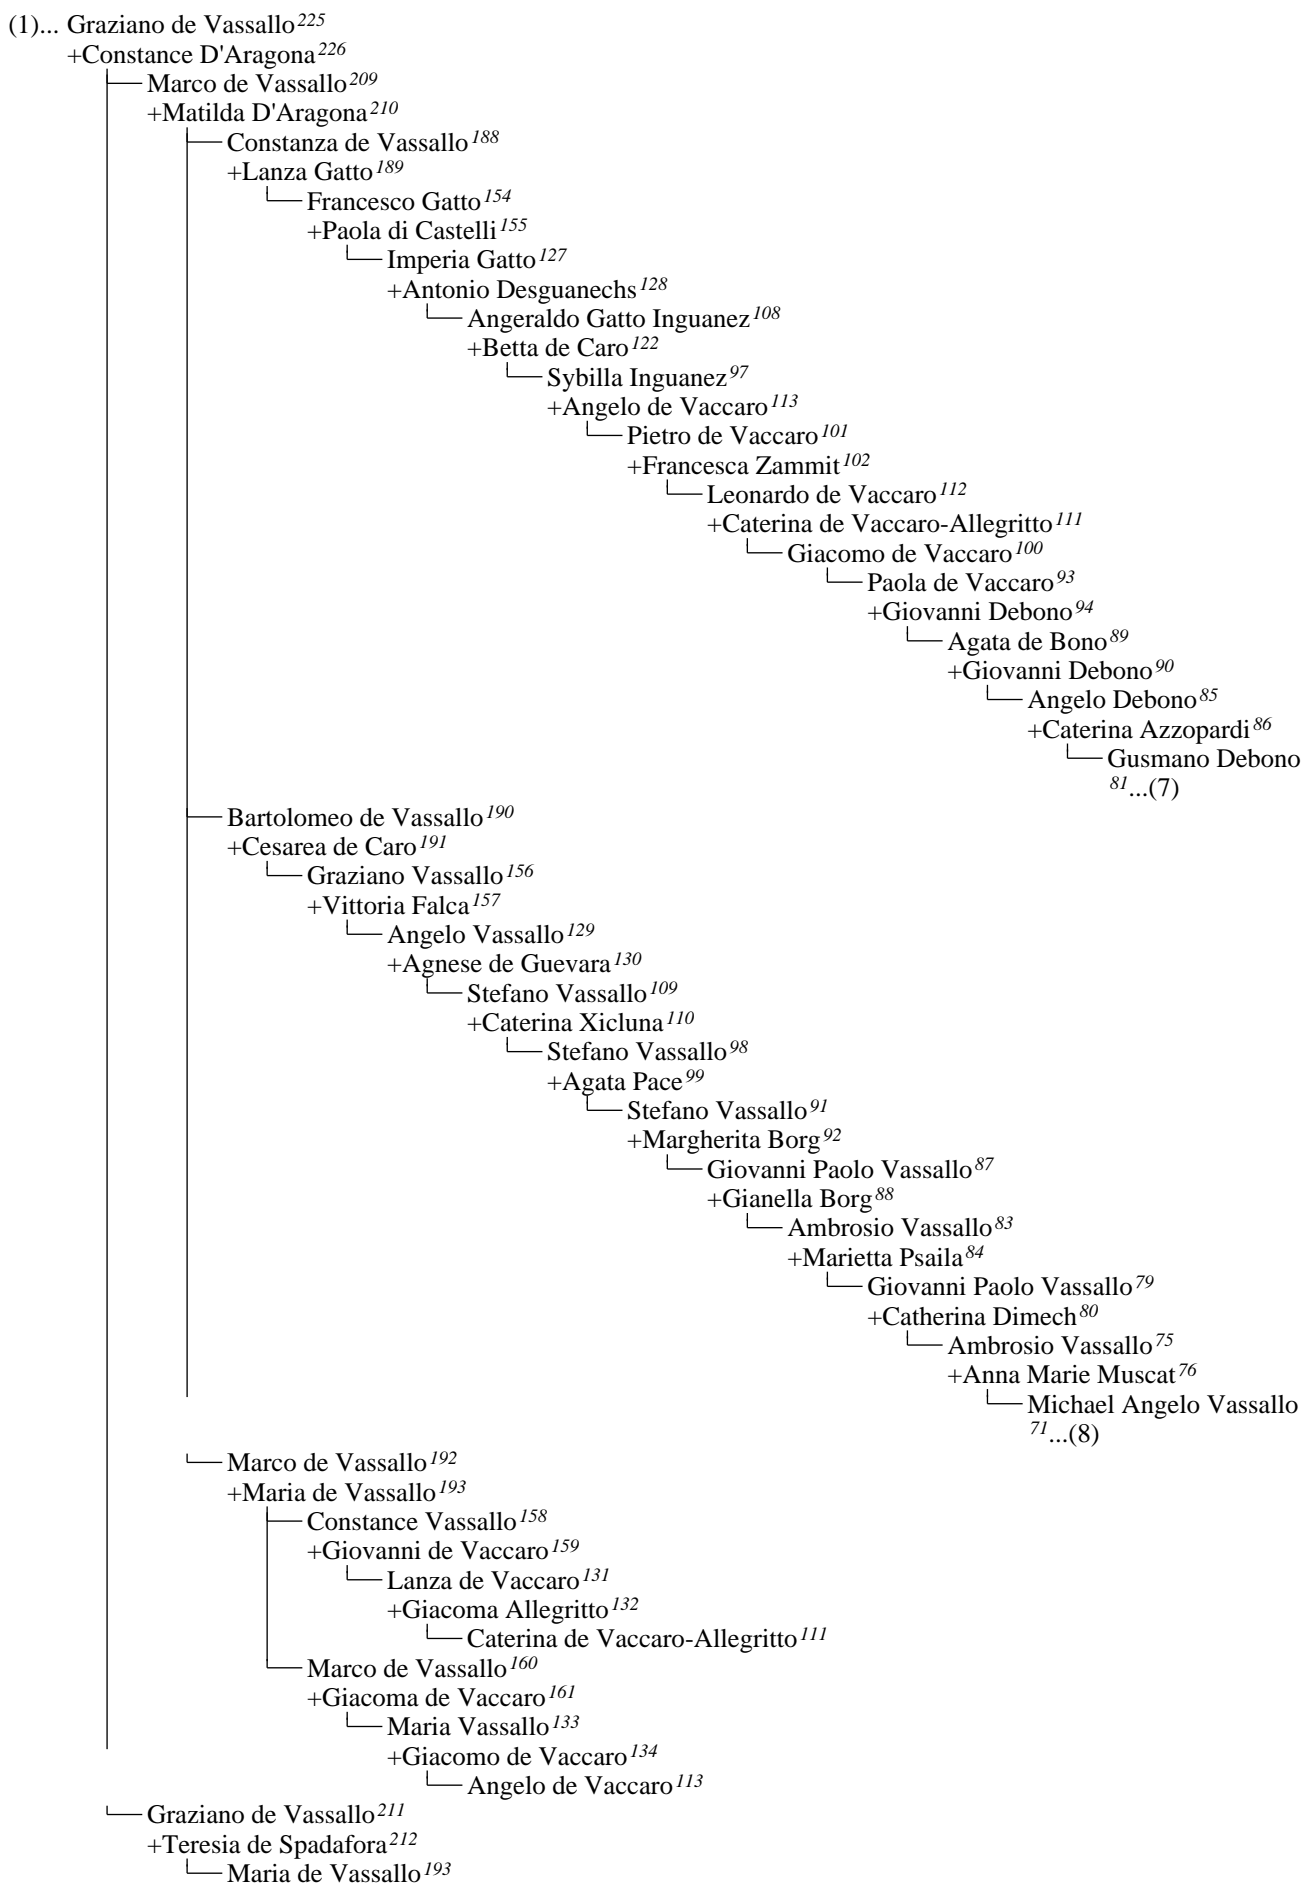

Each family tree shows the reported children, parents, grandparents and great-grandparents of a family group. In order to reduce redundancy, any family group which is wholly included within another family tree may not be reported separately.

Above each of the great-grandparent boxes (top row), a continuation family tree reference number in angle brackets is shown if the great-grandparent is recorded as a child in the continuation tree. A continuation reference number is also shown to the left of a grandparent or parent box if that individual has siblings reported in the continuation tree; and beneath a child box (bottom row) if that individual has children reported in the continuation tree.

In cases of multiple marriages, a continuation reference number preceded by "=" is shown to the right of a parent box. This number references the previous and/or next tree in which that individual is shown with another partner.
